+91-8015033460 ◇ Gurugram, India

harshhraghav2993@gmail.com linkedin.com/in/harshhraghav2003 github.com/Harshvardhan216

OBJECTIVE

Full Stack Developer experienced in building and deploying production-ready web applications using **React.js**, **Node.js**, **REST APIs**, and **modern databases**. Strong focus on clean architecture, performance optimization, scalability, and real-world problem solving.

SKILLS

Frontend	JavaScript , React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend	Node.js, Express.js, REST APIs, JWT Authentication
Databases	MongoDB, PostgreSQL, MySQL
Tools	Git, GitHub, Postman, Browser DevTools, Vite, NPM
Concepts	Async Programming, API Integration, MVC, Responsive Design

EXPERIENCE

Full Stack Developer ABInBev India	July 2025 – Present <i>Remote</i>
---	--------------------------------------

- Built and maintained **React-based applications** consuming **RESTful APIs**.
- Implemented **JWT-based authentication**, authorization, and protected routes.
- Designed and debugged **proxy-based API routing** to improve security and reliability.
- Worked extensively on **asynchronous data flows**, error handling, and state management.
- Collaborated in **Agile sprint cycles** with product, backend, and design teams.

Frontend Development Intern Cloudies	May 2025 – July 2025 <i>Remote</i>
---	---------------------------------------

- Developed **responsive, reusable UI components** from Figma designs.
- Ensured **cross-browser compatibility**, performance optimization, and clean layouts.

PROJECTS

Fitness Hero – Gym Membership Management System (Freelance)

React, Node.js, Express, MongoDB, JWT, Vercel, Render

- Built a **full-stack gym management platform** with secure authentication and user profiles.
- Designed and consumed **REST APIs** with **JWT-based access control**.
- Implemented membership purchase, renewal, and role-based views for users and admins.
- Deployed **frontend on Vercel** and **backend on Render** with environment-based configs.
- Live: [Fitness Hero](#) Code: [GitHub](#)

HunterFit – Gamified Fitness Tracking Platform

React.js, TypeScript, Supabase, PostgreSQL, REST APIs

- Designed and developed a **gamified fitness web application** with workout tracking, streaks, and rank progression.
- Built a **React-based frontend** using reusable components, hooks, and predictable state management.
- Integrated **Supabase Authentication** with **Row Level Security (RLS)** to enforce user-level data isolation.
- Implemented secure **CRUD workflows** for workouts, profiles, and activity feeds using **RESTful APIs**.
- Designed a scalable **PostgreSQL schema** optimized for reads, writes, and leaderboard queries.
- Focused on **performance optimization**, clean architecture, and production-ready data flows.
- Live: [HunterFit](#) Code: [GitHub](#)

EDUCATION

B.Tech in Computer Science Engineering SRM University, Chennai	2021 – 2025 CGPA: 8.83 / 10.0
